

Omni Intelligent IoT

Omni Intelligent IoT is a smart lighting solution that combines the power of IoT with intelligent lighting technology. It offers a range of features and benefits, including energy efficiency, remote control, and smart scheduling. Omni Intelligent IoT is the perfect solution for anyone looking to upgrade their lighting system and create a smart, connected home.

Omni Intelligent IoT

Omni Intelligent IoT is a smart lighting solution that combines the power of IoT with intelligent lighting technology.

Omni Intelligent IoT is a smart lighting solution that combines the power of IoT with intelligent lighting technology. It offers a range of features and benefits, including energy efficiency, remote control, and smart scheduling.

Omni Intelligent IoT is a smart lighting solution that combines the power of IoT with intelligent lighting technology. It offers a range of features and benefits, including energy efficiency, remote control, and smart scheduling.

BLUETOOTH

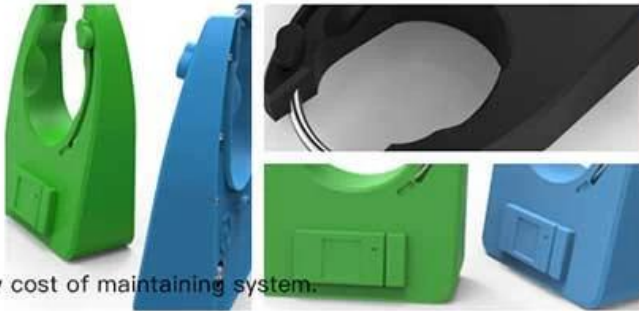

Chain

CHIAN BICYCLE SHARING LOCK

to solving the last mile problem!

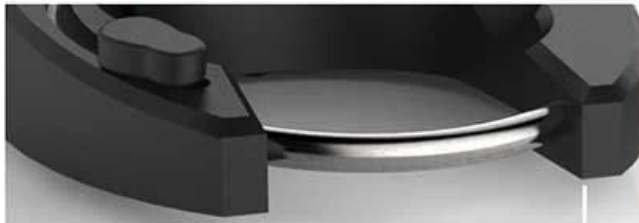

CREATIVE

Low cost of maintaining system.

ADVANTAGES

Innovative working mode system to improve the working stability and time of endurance.

MAIN FUNCTIONS

Bluetooth connection to unlock

Color to choose

- Black
- Blue
- Green
- Yellow

The chain bike lock

is designed and supplied to solving the last mile problem!

Precise Location

Automatic Alarm

Various Payment

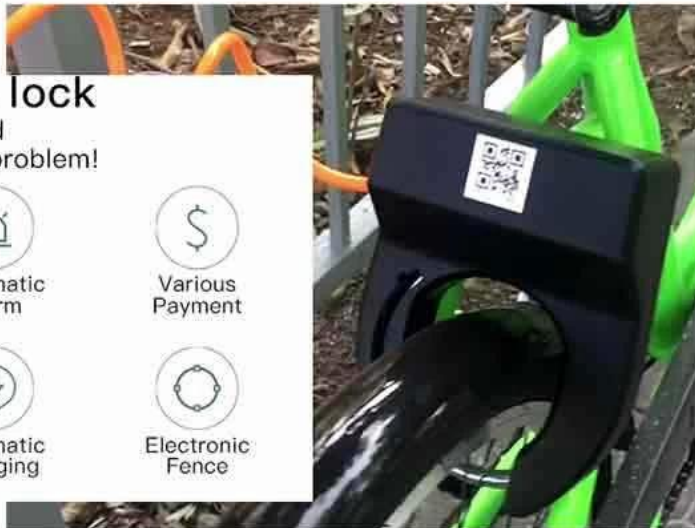

Parking Area Recommendation

Automatic Charging

Electronic Fence

How it works

Bluetooth connection to unlock

APP upload lock ID number to the server

Lock unlock the lock after the completion of the successful return to the server, the server began billing

After the end of the ride, the user manually lock, lock upload lock information to the service station, the end of billing and deduction.
