

# 4G網路與GPS定位

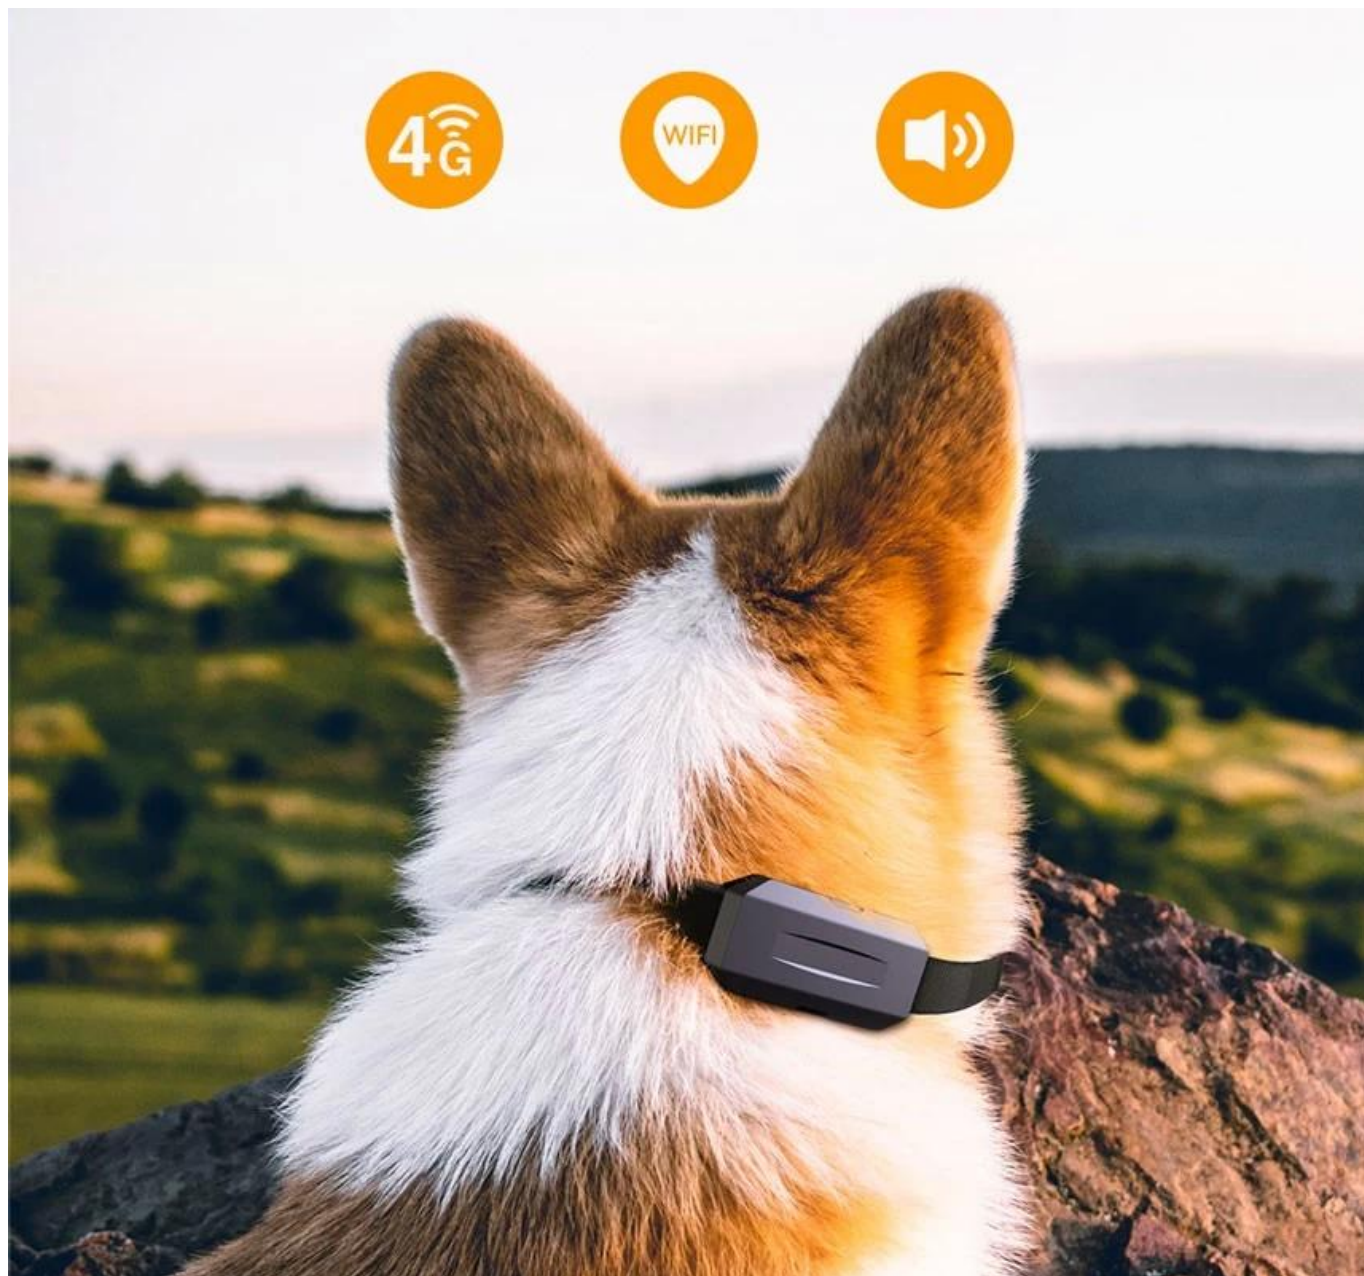

透過4G網路與GPS定位技術，可以實現精確的位置追蹤與數據傳輸。

## GPS定位原理

- 1. 4G網路傳輸
- 2. GPS定位
- 3. 數據處理
- 4. 位置追蹤

GPS定位系統利用衛星信號，結合4G網路，實現高精度的位置定位。

透過GPS定位系統，可以精確地獲取設備的地理位置。

## Online Sales

## Offline Sales

## Offline Sales

## Multi-Mode High-Precision Positioning

Supports GPS/Glonass/BeiDou/Galileo/LBS/Wi-Fi positioning tracking, pet's whereabouts, always in your hands.

## Mobile Trajectory Inquiry

APP to track pet's movement within a certain period of time.

## GEO Fence

The APP alerts pet owners if pets leave designated area.

## IP67 Dustproof And Waterproof

Dustproof and waterproof, letting your pet enjoy freedom in any weather.

# Customized Services

Offering customization services for Color, Logo, APP, and SIM Card.

## Customization of logo and colors

## Custom APP Development

## Custom SIM Card Installation

Embedded chip integration  
(Non-removable)

Back cover SIM card installation  
(Replaceable)

# Product Specifications

---

|                          |                                   |
|--------------------------|-----------------------------------|
| Input Voltage            | 4.9-5.5VDC                        |
| Input Current            | $\geq 1000\text{mA}(5\text{VDC})$ |
| Battery Voltage/Capacity | 3.7V/1200mAH                      |
| Battery Life             | $\geq 20$ Hours                   |
| Operating Temperature    | -20~+60°C                         |
| Waterproof Rating        | IP67                              |
| Shell Material           | PC+10%GF                          |
| Overall Dimensions       | 70.5mm × 34.4mm × 21.9mm          |
| Lanyard Length           | Adjustable up to 40cm             |
| SIM Card                 | NANO-SIM                          |

# Patent Certification

Certified by authoritative institutions, ensuring quality.

# One - Stop Service

One-stop service from 0 to 1: from design and development to production and packaging, and from shipment to after-sales support.
