

Seguimiento de trayectoria de posicionamiento en tiempo real 4G con rastreador GPS para mascotas con geocercado

Este rastreador de mascotas está diseñado para rastrear y localizar mascotas con un avanzado sistema de rastreo GPS con 4G.

Las características del rastreador gps para mascotas

Control remoto de red de 1, 4G,

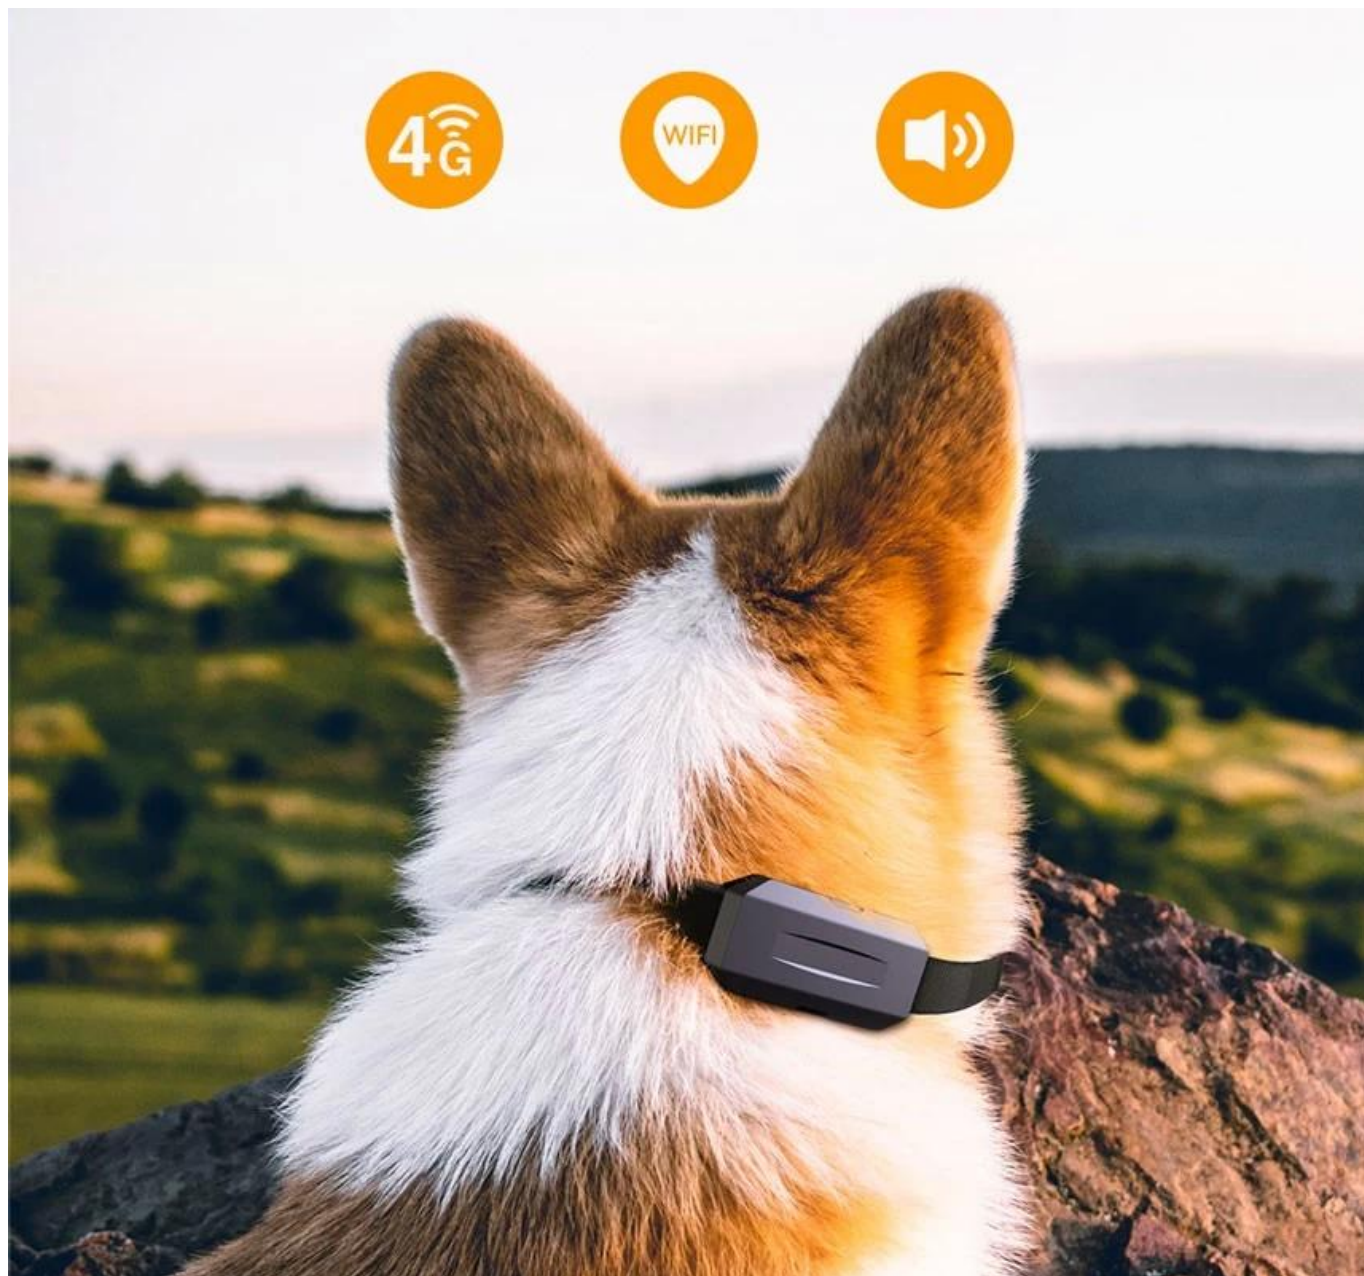

2. Posicionamiento GPS en tiempo real,

3. Comunicación Bluetooth

4. detección de movimiento y seguimiento de ubicación.

El rastreador gps para mascotas se comunica con el servidor backend a través de la red 4G y con la aplicación móvil a través de Bluetooth, lo que permite monitorear en tiempo real la ubicación de la mascota.

La información en tiempo real se enviará a la aplicación de seguimiento de mascotas para que los dueños de mascotas reciban todas las notificaciones fácilmente.

Customized Services

Offering customization services for Color, Logo, APP, and SIM Card.

Customization of logo and colors

Custom APP Development

Custom SIM Card Installation

Embedded chip integration
(Non-removable)

Back cover SIM card installation
(Replaceable)

Product Specifications

Input Voltage	4.9-5.5VDC
Input Current	$\geq 1000\text{mA}(5\text{VDC})$
Battery Voltage/Capacity	3.7V/1200mAH
Battery Life	≥ 20 Hours
Operating Temperature	-20~+60°C
Waterproof Rating	IP67
Shell Material	PC+10%GF
Overall Dimensions	70.5mm × 34.4mm × 21.9mm
Lanyard Length	Adjustable up to 40cm
SIM Card	NANO-SIM

Patent Certification

Certified by authoritative institutions, ensuring quality.

One - Stop Service

One-stop service from 0 to 1: from design and development to production and packaging, and from shipment to after-sales support.
