Be careful!

Inferior masks are more terrible than pollution!

Cheap masks use unknown raw materials and have no filtering and protective effects. The harmful substances in them, on the contrary, will harm the human body.

Buying a mask is buying a meltblown cloth!

Masks that do not use meltblown cloth as filter material are all hooligans

Wide cotton straps

Information

Model: flat

Specifications: 17.5x 9.5cm

[Product performance structure and composition]

This product consists of a mask body, a nose clip, and a mask band. The cover body is composed of three layers of filter materials; the front and back layers are polypropylene spunbond non–woven fabrics, the middle layer is polypropylene melt–blown non–woven fabric, and the nose clip is metal core plastic. The mask band is made of elastic polyester spandex. For non–sterile products,––for single use.

[Product scope and use]

It is suitable for covering the user's mouth, nose and jaw. It is used in ordinary medical environment to wear and block the mouth and nasal cavity from exhaling or spraying pollutants.

[Instructions for use]

Flatten the mask with the dark side facing outwards and the nose clip facing up. Wear it on the nose and mouth and hang the earband on the ear.

[Precautions, warnings, and informative instructions]

1. Please use within the validity period.

2. Only for one–time use, please destroy and dispose according to regulations after use.

3. The packaging is damaged and it is forbidden to use it.

4 Use with caution to those who are allergic to nonwovens.

5 Please read the instructions before use.

[Special storage conditions and methods]

Store in a relative humidity not exceeding 80%, non–corrosive gas and well–ventilated room, avoid high temperature.
