

Monitoraggio della traiettoria di posizionamento in tempo reale 4G con localizzatore GPS per animali domestici Geo-fencing

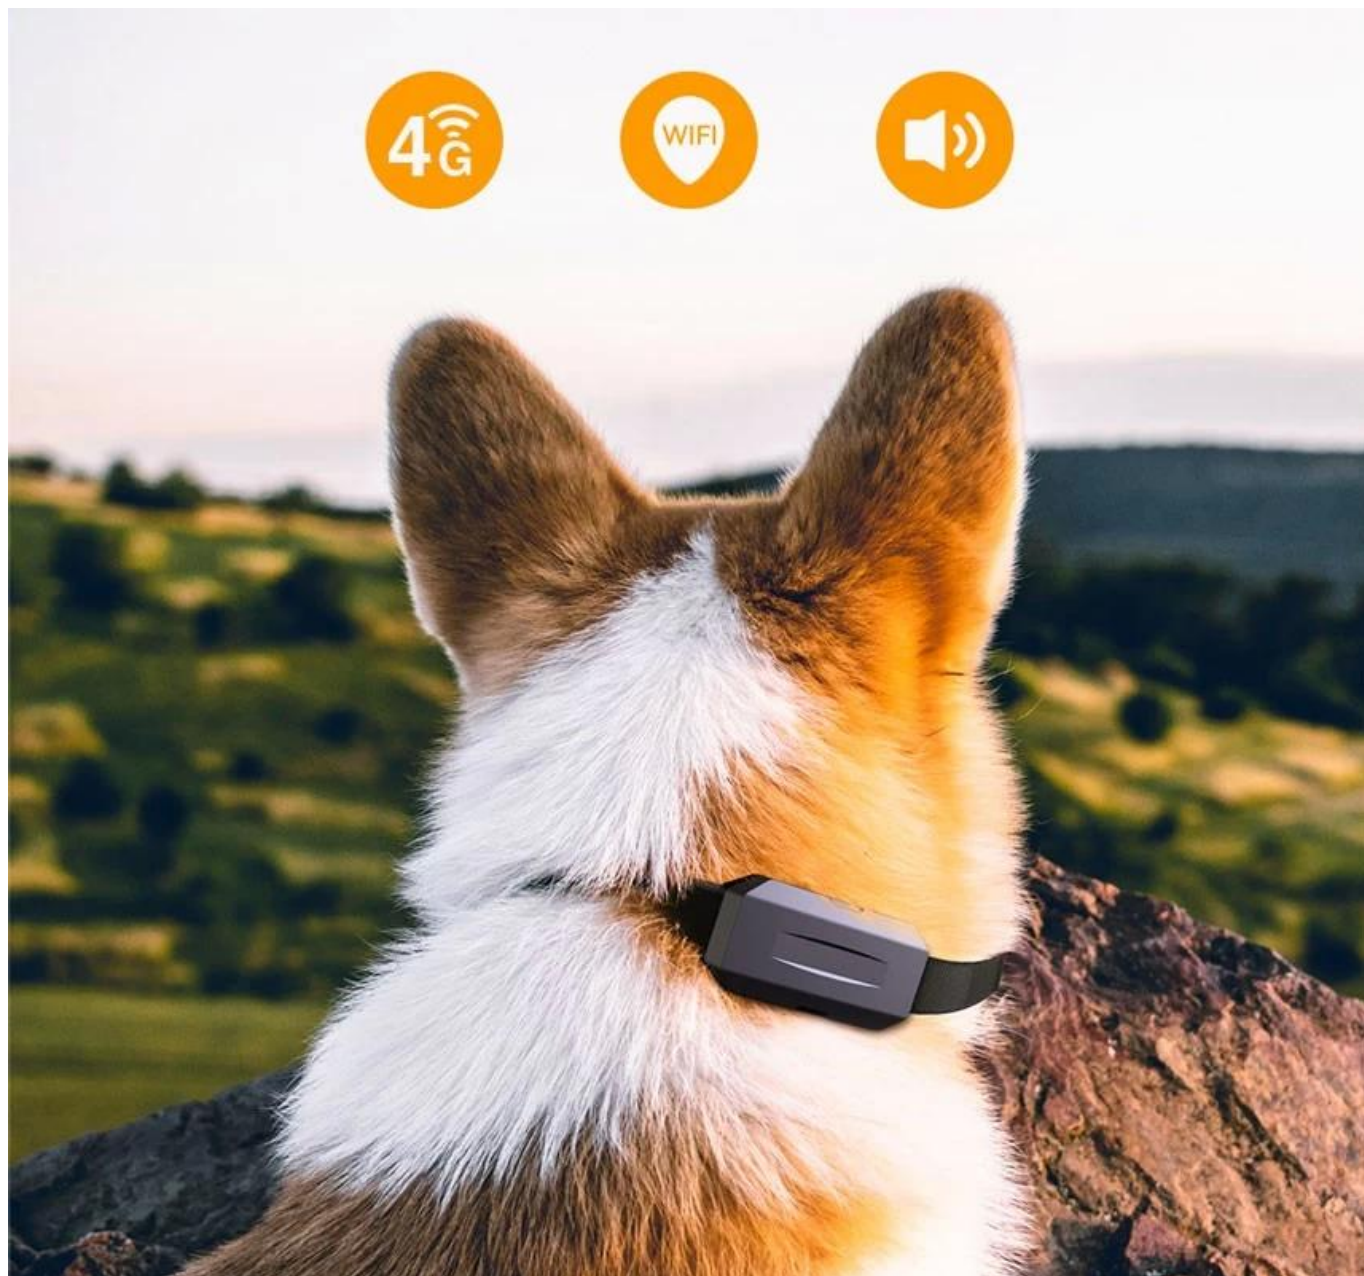

Questo localizzatore di animali è progettato per tracciare e localizzare gli animali domestici con un sistema di localizzazione GPS avanzato con 4G.

Le caratteristiche del localizzatore gps per animali domestici

1. Controllo remoto della rete 4G,
2. posizionamento GPS in tempo reale,
3. Comunicazione Bluetooth
4. rilevamento del movimento e rilevamento della posizione.

Il localizzatore GPS per animali comunica con il server backend tramite la rete 4G e con l'app mobile tramite Bluetooth, consentendo il monitoraggio in tempo reale della posizione dell'animale.

Le informazioni in tempo reale verranno inviate all'APP di localizzazione degli animali domestici in modo che i proprietari di animali domestici ricevano facilmente tutte le notifiche.

Embedded chip integration
(Non-removable)

Back cover SIM card installation
(Replaceable)

Product Specifications

Input Voltage	4.9-5.5VDC
Input Current	$\geq 1000\text{mA}(5\text{VDC})$
Battery Voltage/Capacity	3.7V/1200mAH
Battery Life	≥ 20 Hours
Operating Temperature	-20~+60°C
Waterproof Rating	IP67
Shell Material	PC+10%GF
Overall Dimensions	70.5mm × 34.4mm × 21.9mm
Lanyard Length	Adjustable up to 40cm
SIM Card	NANO-SIM

Patent Certification

Certified by authoritative institutions, ensuring quality.

One - Stop Service

One-stop service from 0 to 1: from design and development to production and packaging, and from shipment to after-sales support.
