

Il dispositivo IoT Escooter funziona con l'APP Escooter Rental per la gestione degli Escooter

Il dispositivo IoT è un localizzatore di scooter e un dispositivo antifurto, oltre ad essere un parcheggio e monitoraggio per scooter elettrici, tracciamento dei veicoli in tempo reale e serratura intelligente attivata tramite QR.

È ampiamente utilizzato per le attività di condivisione del noleggio di escooter intelligenti e per gli escooter intelligenti per uso personale.

Dual-frequency GPS + inertial navigation positioning

L1/L5 GNSS dual-frequency positioning enhances accuracy and resistance to interference.

GEO Fence

Set parking boundaries; alerts if exceeded.

Audio Broadcast

Built-in speaker with up to 60 seconds of voice storage.

Eco-friendly Plastic

Matte finish, durable and resistant to impact, corrosion, and heat.

IoT Device Applications

A shared and personal e-scooter solution offers real-time monitoring of location, battery, speed, and riding habits for health insights.

For fleet manufacturers, it can be customized, and real-time tracking.

After proofreading, riders can use the OMNI APP or your app with Bluetooth (4G, compatible with 2/3G) to sync e-scooter parameters for personalized control.

Short-term or long-term e-bikes and e-scooters rental

Monitor vehicles and user activity in real-time, streamline rental and

Smart e-bikes and e-scooters sharing

Scan to use, auto lock/unlock, real-time data reporting, and constant back-end monitoring.

IoT Workflow

Fleet Management System

Customizable backend system + app for fleet management, customer support, and income tracking.

Core advantages

Over 200 patented technologies

World-leading shared platform solutions

Hardware + software + structure, full industry chain support

Professional R&D team

Alliance of 100 high-quality supply chain partners

More than 50 million users worldwide
