

4G real-time positionering van het traject volgen met geo-fencing huisdier GPS-tracker

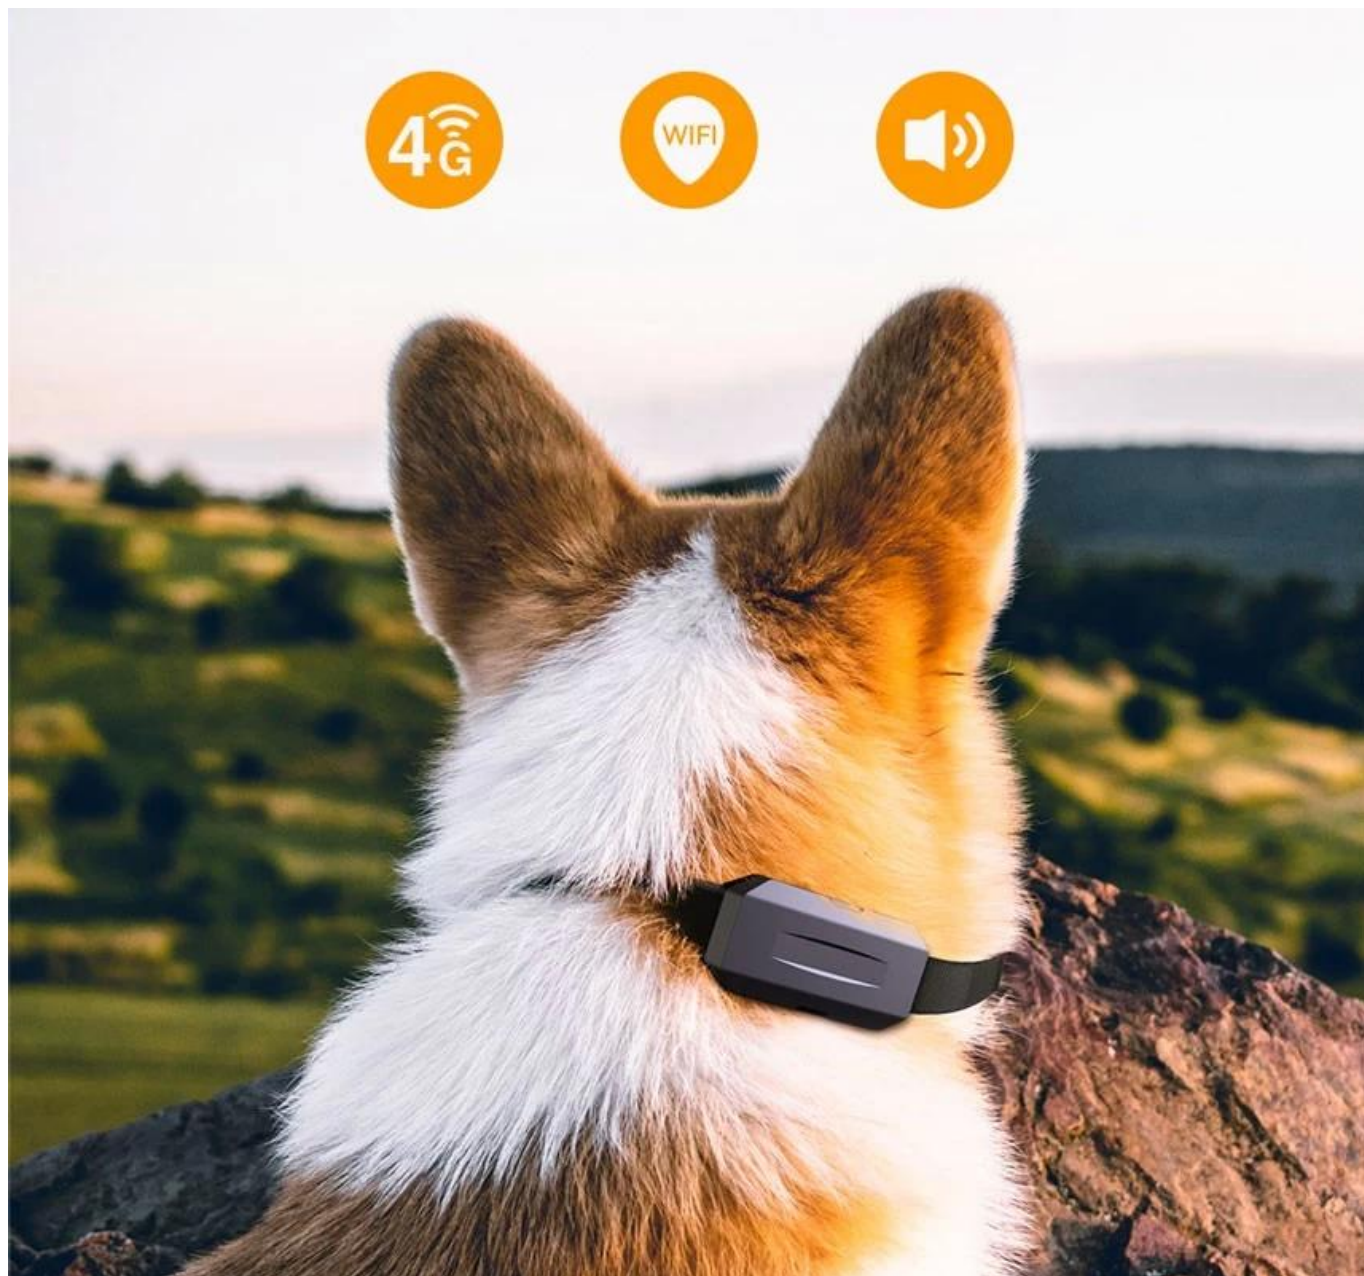

Deze huisdierentracker is ontworpen voor het volgen en lokaliseren van huisdieren met een geavanceerd GPS-volgsysteem met 4G.

De kenmerken van de GPS-tracker voor huisdieren

1. 4G-netwerkafstandsbediening,
2. real-time GPS-positionering,
3. Bluetooth-communicatie
4. bewegingsdetectie en locatietracking.

De huisdiergps-tracker communiceert met de backend-server via het 4G-netwerk en met de mobiele app via Bluetooth, waardoor realtime monitoring van de locatie van het huisdier mogelijk is.

De realtime informatie wordt naar de app voor het volgen van huisdieren verzonden, zodat eigenaren van gezelschapsdieren alle meldingen gemakkelijk kunnen ontvangen.

Sales Channels

Suitable for online shops, retail stores, supermarkets, and various other scenarios

Online Sales

Platforms like
E-commerce shops.

Dustproof and waterproof, letting your pet enjoy freedom in any weather.

Customized Services

Offering customization services for Color, Logo, APP, and SIM Card.

Customization of logo and colors

Custom APP Development

Custom SIM Card Installation

Embedded chip integration
(Non-removable)

Back cover SIM card installation
(Replaceable)

Product Specifications

Input Voltage	4.9-5.5VDC
Input Current	$\geq 1000\text{mA}(5\text{VDC})$
Battery Voltage/Capacity	3.7V/1200mAH
Battery Life	≥ 20 Hours
Operating Temperature	-20~+60°C
Waterproof Rating	IP67
Shell Material	PC+10%GF
Overall Dimensions	70.5mm × 34.4mm × 21.9mm
Lanyard Length	Adjustable up to 40cm
SIM Card	NANO-SIM

Patent Certification

Certified by authoritative institutions, ensuring quality.

One - Stop Service

One-stop service from 0 to 1: from design and development to production and packaging, and from shipment to after-sales support.
