

Phone App Control Bluetooth Smart Bike Lock For Bicycle Outdoor

Omni [smart bike lock](#) is the first smart bike lock designed to accommodate larger e-bike wheels, while remaining compatible with traditional bike sizes. Solar recharge capacity means Unlimited time standby, not need to worry about battery life.

Omni smart bike lock, which connected to unlock the bicycles by smartphone app within Bluetooth range (120m), is the world's first smart bike lock to combine security features that urban cyclists demand with the advanced fleet management functionality that bike share operators need. It is an automatic lock that recognizes your smartphone. No more bending over, looking for your keys, taking away from the riding experience. The keyless entry is seamless- if you approach your bike, it unlocks itself, if you leave your bike, it locks automatically. It takes 1 second to unlock your bike. So you can focus on the more important things in life. Omni goal is to provide convenience and security to urban cyclists.
