PRODUCT FEATURES

ONE TOUCH

Doormate can be a universal, easy do-it-yourself product that retrofits to your existing, free-running, residential sliding doors or windows.

FREEDOM FOR YOUR PETS

No longer have to run up and down the stairs just to open the doors for your dogs!

LIFESTYLE WHEN HANDS ARE FULL

It's amazing how such a small solution can create such an ease in life when your hands are full.

CONVENIENCE WHEN ENTERTAINING

Installed easily and works well, appears to very nice designing.

PRACTICAL

Super quiet and powerful. Feature rich and very versatile for integrating with home automation.

PRODUCT DETAILS

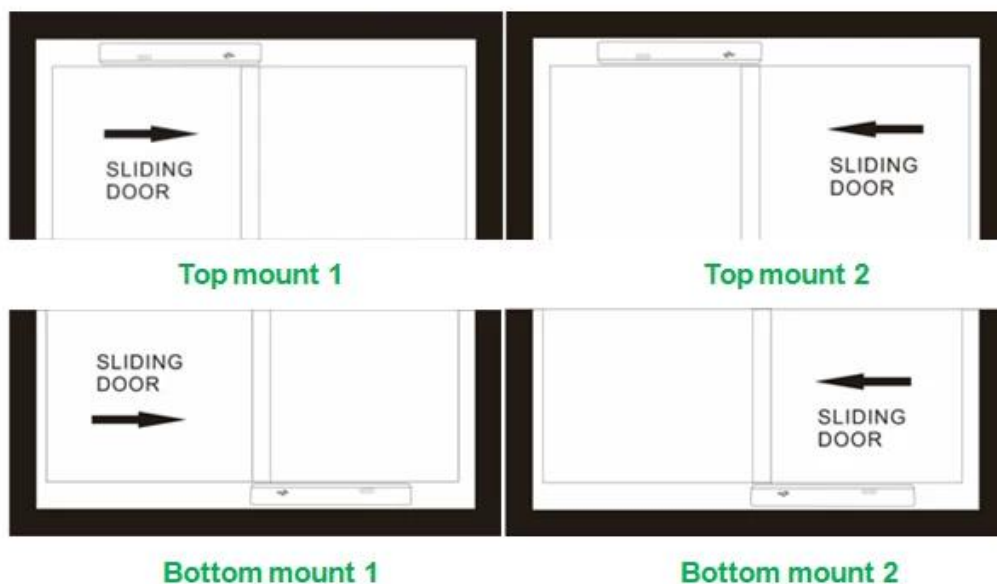

Automatic Mode(Green LED)—Door/Window will open after the sensor or remote control being triggered, and close automatically after the preset time.

Hold open Mode(Blue LED)—Door/Window will open and keep full open until changed to other modes.

Manual Mode(Red LED)—Door/Window could be operated by hands, operator will not drive it.

Pet Mode(Orange LED)—Door will open to the width has been set for pet after the pet sensor being triggered, and close automatically after the preset time.
